Tails - Feature #11501

Feature # 9005 (Resolved): Tails Installer without a splash screen

Confirmation dialog of Tails Installer should use verbs for button instead of Yes/No

05/30/2016 01:52 PM - sajolida

Description

Quite often when I use Tails Installer myself to upgrade my USB sticks I have a moment of doubt on the confirmation dialog "Please confirm your device selection". Even if the message is clear, this step might erase all of my data so I'm very scared of having chosen the wrong entry in the splash screen.

I think that using verbs ("Cancel" and "Install" or "Upgrade") in this confirmation dialog would help me. It's usually a good practice nowadays anyway.

Action words for proposing/confirming actions is the way to go XD

#2 - 11/17/2016 01:56 PM - Anonymous
This might require having #8860 first. Otherwise how would we know whether the label "Install" or "Upgrade"?

kurono: I feel like I can't do that myself because it requires some coding logic to alternate between "Install" and "Upgrade" but maybe you can do a rough draft of the coding logic and then I can work on putting the right words in the right place.

Sajolida: I have made a first draft of this. The only thing is that I don't know if it was already translatable. I have followed the format to make it translatable (I think).

This won't make it into 3.9.

Sorry for the huge delay in reviewing this...

I like what I can understand from 0b2d20af.

Reassigning to the Foundations Team lead to find someone to review that.

I'll also let intrigeri change the target version if that's too big to go in 3.10.
Hey kurono! Great work, code review passes. I believe this requires a test suite update and I think it's going to be trivial (git grep -w Yes --
features/step_definitions/). IIRC your setup allows you to build a custom ISO (drop your patch in config/chroot_local-patches/) and to run automated
tests, right? Do you want to complete this work by preparing and testing the corresponding automated test suite update? If yes and if done in time, I'm
happy to take this into 3.10. Otherwise, we'll see when we have time to do the test suite work.

Hi intrigeri, thanks :)
I will try to make it on time, lets see if it happens before 3.10.

Ok, I have changed the test suite, to validate these new labels. I tested all the usb scenarios and they passed. I pushed a new branch:
tails:kurono/feature/11501-install-verbs-instead-yes-no

Great, thanks! I've made the code a bit more DRY and Rubyish with commit:138305c7a99ca71988299559a8069cb4d35d7820, imported your
tails-installer work as a local patch in tails.git, and pushed the result to Jenkins.

#16 - 10/15/2018 04:52 PM - intrigeri
Also, rebased on top of the stable branch so there's a chance we ship this to users this year.

#17 - 10/16/2018 08:46 AM - intrigeri
- Related to Bug #16053: Re-enable USE_LAST_RELEASE_AS_OLD_ISO on Jenkins after Tails 3.10 is released added

#18 - 10/17/2018 07:45 AM - intrigeri
- % Done changed from 50 to 70

Test suite passes on Jenkins => I'm going to merge this into the Installer's Git repo, prepare a new upstream release, package it, and do the APT overlay dance so I can merge this into tails.git.

#19 - 10/17/2018 11:22 AM - intrigeri
- Status changed from In Progress to 11
- Assignee deleted (intrigeri)
- % Done changed from 70 to 100
- QA Check changed from Ready for QA to Pass

Merged :)
