**Description**

The [Incognito's documentation](https://example.com) has been imported.

Left to do:

- see the comments on [#6868](https://example.com) for a list of things that were inherited from Incognito's documentation
- we've moved autorun in Windows ([#6083](https://example.com)) to the wishlist, so tails within windows should be dropped.

Off-topic here:

- [thunderbird](https://example.com): now tracked on children ticket from Return of Icedove? ([#7158](https://example.com))
