Description

In our documentation we sometimes refer to our browser as "Tails browser", "Tor Browser", "Tor browser". We should use consistently "Tor Browser" because, it is more accurate, and upstream is ok with that.

The documentation on fingerprinting ("Can I hide the fact that I am using Tails?") should also be updated with this change in mind, as it often refers to our browser in comparison with the "Tor Browser Bundle".

Some occurrences of "Tails browser" were left in some PO files. When we do changes that we do not require for sure any supervision by the translators themselves, such as this one, it is nice to also update the PO so that the translations are not broken.

I also fixed the markup of a title, in FAQ, the ‘----’ was not updated. That's probably no big deal in markdown.

See 0eae36.

Apart from that, congrats!
