**Description**

In seahorse-nautilus 3.8:

- No menu entry to check a signature (either selecting only the detached signature or both the original file and the detached signature)
- There is signature checking in seahorse-tool.
- The notification is far from ideal (doesn't show keyid nor fingerprint and disappears quickly).
- [https://bugs.launchpad.net/ubuntu/+source/seahorse-nautilus/+bug/995623](https://bugs.launchpad.net/ubuntu/+source/seahorse-nautilus/+bug/995623)

**Fixed upstream:**

- shared-mime-info
  - [https://bugs.freedesktop.org/show_bug.cgi?id=65679](https://bugs.freedesktop.org/show_bug.cgi?id=65679) (commit 2c3438c): Add missing globs and tests for OpenPGP files; fixed in s-m-i 1.2 (in Jessie)
  - [https://bugs.freedesktop.org/show_bug.cgi?id=70539](https://bugs.freedesktop.org/show_bug.cgi?id=70539): Fixes the issue with .asc files for inline signatures: do not propose to verify the signature, since Seahorse doesn't know how to do that. Merged upstream in December, 2013. Fixed in s-m-i 1.3: [https://bugs.debian.org/743942](https://bugs.debian.org/743942)
- seahorse-nautilus
  - [warn when signatures are valid but untrusted](http://seahorse-nautilus.readthedocs.io/en/latest/#warn-when-signatures-are-valid-but-untrusted): will be fixed in the release after 3.10.1 (not a blocker for Tails 1.1)

**Subtasks:**

- Feature # 7039: Install a backport of shared-mime-info 1.2+  
  - [Resolved]
- Feature # 7040: Wait for the shared-mime-info answer wrt. backporting for Wheezy  
  - [Resolved]
- Feature # 7058: Backport shared-mime-info 1.2+ for Wheezy  
  - [Resolved]

**Related issues:**

- Related to Tails - Bug #7079: Install a backport of shared-mime-info 1.3+  
  - [Resolved] 04/13/2014

**Associated revisions**

Revision fa92d72f - 04/13/2014 10:34 AM - Tails developers
Install shared-mime-info from wheezy-backports (Closes: #6608, #7039).
