Hi,

Just gave a try to the new upstream release packaging. Seems trivial enough to me : I'll submit a patch to the maintainer once I've tested it for a bit.

Wonderfull! Do you want the Redmine credentials needed to assign this ticket to yourself?
I just received a response from Janos, the Debian Maintainer for seahorse-nautilus.

He's in vacation right now, so can't upload the changes I submitted, but it's fine for him if we can find someone else that can.

I can upload, but likely it won't happen before a week at least, and I would like to see a public statement by the maintainer (e.g. on the BTS) that he's fine with it. Maybe it'll be faster if you try and find a sponsor by other means, e.g. via https://mentors.debian.net/ :)

Great news! Is this answer somewhere to be seen?

#13 - 08/16/2014 11:36 PM - intrigeri
- Target version changed from Tails_1.2.1 to Tails_1.2

Actually, 1.2.1 will be out after the freeze, so rescheduling.

#15 - 09/15/2014 08:26 PM - intrigeri
- % Done changed from 50 to 70

seahorse-nautilus (3.11.92-1) was uploaded to sid. Let's now wait for it to migrate to testing, before marking this ticket as resolved.

@nodens: congrats!
